## SUMMARY

---

Software Engineer with 4 years of experience building scalable web applications and production-grade Generative AI (RAG) systems. Backed by rigorous Software and Quantum Engineering degrees from UPC, pairing strong algorithmic problem-solving with hands-on delivery in modern React/TypeScript ecosystems and Python backends. Applies well-founded design patterns and clean architecture principles to build resilient, high-performance production software.

## EXPERIENCE

---

### Software Full-Stack Developer

Boosting Analytics | Sep. 2024 - Oct. 2025

- Engineered a production RAG system enabling semantic search over +1,000 industrial datasheets, significantly cutting document retrieval time.
- Built a full-stack HubSpot & LinkedIn integration with LLM-powered messaging, automating lead report generation and increasing sales outreach efficiency.

### Software Frontend Developer

Entrust | Jul. 2023 - Jul. 2024

- Architected a React SPA to visualize and analyze high-volume Certificate Transparency (CT) logs, delivering an automated monitoring tool for the security team to audit domain SSL/TLS certificates.

### Software Engineering Intern

Entrust | Sep. 2022 - Jul. 2023

- Developed a React Native mobile wallet proof-of-concept integrating Self-Sovereign Identity (SSI) paradigms with an IDaaS platform for decentralized digital certificate issuance.

## EDUCATION

---

### Postgraduate in Quantum Engineering

UPC School | Oct. 2025 - Jun. 2026

### Bachelor's degree in Informatics Engineering - Major in Software Engineering

UPC - Barcelona School of Informatics (FIB) | Sep. 2018 - Jun. 2022

## SKILLS
